Program at-a-glance

Students attending Lied STEM Academy are actively engaged in regular interdisciplinary projects designed with a STEM focus and a foundation in Project Lead the Way. As a Nevada Ready 21 1-to-1 Chromebook school, each student has 24-hour access to curriculum through Google for Education. All Lied STEM Academy students are introduced to Robotics, Architecture, Computer Science, a second language, and a visual/performing art. Students then have the opportunity to further develop and enhance their skills in their areas of interest.

The strength of Lied STEM Academy lies in preparing all students with technology and STEM based college and career skills. Community partnerships enhance the curriculum learned in classes through practical experiences

Lied STEM Academy
